【a.】
Red fire ants are taking over Taiwan!  The little evils are from Brazil in South America.  They come with plants and soil by taking boat- trips to Taiwan.  They spread out on the farms, but they don’t eat rice or vegetables.  They bite farmers and even get into people’s houses.  They could make electrical things to stop working and also make people really sick.

Red fire ants are red and brown.  They could bite many times.  They could rebuild their homes very quickly even if you destroyed them.  Once a fire ant bites you, you have to put ice on it right away.  Then, go wash it with soap and water.  Do not scratch it with your fingers. That will make it go all over your body.  If you feel sick, go to see a doctor as soon as possible!

【c.】
Do you keep a pet or did you keep a pet?  It is an interesting question.  But the answers to this question are not fun.  Did you remember why you bought your puppies?  Was it only because they were very cute at first, and you didn’t care about other things?  Some people still keep their dogs, but some give them up.  They “did so” only because they thought they were not cute at all, and everything was trouble.  But before you bought them, why didn’t you think about it?  Remember!  There are thousands of pets on the street.  Be nice to them and careful about your “family”.
